

## Environmental Policy Statement

At Emerald Pest Control Ltd we recognise that taking responsibility for the impact our activities may have on the environment is an integral part of a successful and responsible business strategy. We will take all reasonably practicable steps to prevent, minimise or render harmless the effect our activities and the products we use, have on the environment.

We are committed to ensuring compliance with all existing U.K. legislation which relates to the safe use of pesticides and rodenticides and best practice in the pest control industry in general. In respect of rodent control, we follow the CRRU UK Code of Best Practice (March 2015).

We will strive to use products which have the minimum environmental impact during use and subsequent disposal

- Minimise the use of pesticides by placing a greater emphasis on Integrated Pest Management and by working in partnership with clients to reduce the likelihood of pest ingress and infestation.
- Minimise waste generated by the company through better utilisation of raw materials, energy and water and increased use of renewable, reusable or recyclable material by liaising with suppliers.
- Expand awareness and use of our existing recycling facilities and provide additional facilities for as wide a range of recyclable materials as possible to reduce waste to landfill. We will use only reputable licensed waste carriers.
- Improve energy efficiency by the sensible energy management of our buildings, equipment and vehicles.
- Carry out regular audits to ensure effective implementation of our Environmental Policy.
